

RIGHT Symposium

RNAi for Therapy

9 November 2008

9.30 - 16.30

SANA Malhoa Hotel , Lisbon

Speaker:

Patrick Arbuthnot - University of the Witwatersrand, Johannesburg, South Africa

Ben Berkhout - University of Amsterdam, The Netherlands

John F. Cryan - University College Cork, Ireland

Olaf Heidenreich - Newcastle University, UK

Alexander Karlas - Max Planck Institute for Infection Biology, Berlin, Germany

Jørgen Kjems - University of Aarhus, Denmark

George Kollias - Fleming Research Center, Vari, Greece

Gert Storm - Utrecht University, The Netherlands

Hans-Peter Vornlocher - Roche Kulmbach GmbH, Kulmbach, Germany

For further information and registration please visit www.ip-right.org

The aim of this symposium is to give the audience insights into the immense potential of RNA interference for therapeutic approaches in order to foster the development of RNAi-based therapeutics. In addition, this symposium should provide a platform for presenting achievements made in the RIGHT consortium during the last four years. In addition, this symposium should provide a platform for presenting achievements made in the RIGHT consortium during the last four years and it is organised in conjunction with the ESF.

Organising committee: Simone Hess, Jørgen Kjems, Thomas F. Meyer

About the RIGHT project

RIGHT stands for RNA Interference TechnoloGy as Human Therapeutic tool. It is a research project supported by funding under the Sixth Research Framework of the European Union and coordinated by Thomas F. Meyer at the Max-Planck-Institute for Infection Biology in Berlin. The project started in January 2005 for a duration of four years. It brings together 25 research institutes, universities and companies and aims at exploiting and further developing the vast potential of RNAi to provide effective therapeutic tools for the treatment of severe diseases.
